I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law [Section 590.650](#), RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each vehicle stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency that does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The summary of statewide racial profiling data has been provided by Scott H. Decker, professor and director of the School of Criminology and Criminal Justice at Arizona State University; Richard Rosenfeld, professor in the Department of Criminology and Criminal Justice at the University of Missouri-St. Louis; and Jeffrey Rojek, assistant professor in the Department of Criminology and Criminal Justice at the University of South Carolina.

Table 1. 2010 statewide summary of results

Key Indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Population	4,734,958	3,947,287	508,188	122,083	73,073	24,269	60,058
Stops	1,688,720	1,336,273	292,275	33,825	13,934	1,370	11,043
Searches	111,616	75,780	30,828	4,081	380	94	453
Arrests	83,919	56,372	23,857	3,012	283	77	318

	4.97%	4.22%	8.16%	8.90%	2.03%	5.62%	2.88%

Arrest rate							
-------------	--	--	--	--	--	--	--

Notes: Population figures are 2010 census estimates for persons 16 and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

[[back to top](#)]

II. STATEWIDE FINDINGS

This report summarizes the data from 630 law enforcement agencies in Missouri for calendar year 2010. An additional 44 agencies indicated they made no traffic stops during the year. This represents 98.3% of the 698 law enforcement agencies in the state. The agencies filing reports recorded a total of 1,688,720 traffic stops, resulting in 111,616 searches and 83,919 arrests. [Table 1](#) breaks out the stops, searches and arrests by race and ethnic group. [Footnote 1](#)

The population totals in the table are Census estimates for 2010 compiled by Geolytics, Inc. In reports for years prior to 2005, the population totals were from the 2000 Census. The estimated totals are used in this report to reflect population change in Missouri since 2000. "These estimates," according to the U. S. Census Bureau, "are used in federal funding allocations, as denominators for vital rates and per capita time series, as survey controls, and in monitoring recent demographic changes" (emphasis added; see www.census.gov/popest/estimates.php). [Footnote 2](#)

Four summary indicators are included in Table 1 that may be useful in initiating further assessments of racial profiling in traffic stops. The first, termed the "disparity index," relates each group's proportion of total traffic stops to its proportion of the driving-age population 16 years-old and older. A value of 1 on this index indicates that a group's proportion of traffic stops equals its population proportion: it is neither "under-represented" nor "over-represented" in traffic stops. Values above 1 indicate over-representation, and those below 1 indicate under-representation. For example, the 1,336,273 whites who were stopped accounted for 79.1% of all traffic stops in 2010. Whites comprise an estimated 83.4% of Missouri's driving age population. The value for whites on the disparity index is, therefore, .95 (.7913/.8336). Whites were stopped, in other words, at slightly below the rate expected based on their fraction of the estimated population age 16 and over.

The same is not the case for several of the other groups. African-Americans represent 10.73% of the population sixteen years and older but 17.31% of all traffic stops, for a value on the disparity index of 1.61. African-Americans were stopped at a rate 61% greater than expected based solely on their proportion of the population sixteen and older. Hispanics were stopped at a rate somewhat below their population proportion, and Asians, American Indians, and persons of mixed or unknown race were stopped at a rate well below their proportion of the driving-age population. The values on the disparity index for the different groups can be compared directly to one another. For example, the likelihood that a black motorist was stopped is 1.69 times that of a white motorist (1.61/.95). In other words, blacks were 69% more likely than whites to be stopped based on their respective proportions of the Missouri driving-age population in 2010.

The disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population age 16 and over, and not of the population of motorists on the state's streets, roads, and highways. A group's share of the residential population age 16 and over may or may not equal its proportion of drivers. Although in most instances the two proportions should be close, that may not always be the case. The extremely low DI value for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, motorists from other states are stopped on Missouri's roadways. To the extent that out-of-state drivers do not reflect the race and ethnic composition of Missouri's population, the Disparity Index will not accurately portray the probability that Missouri residents are stopped.

The second indicator that can be used to assess racial profiling is the "search rate," or the number of searches divided by the number of stops (x 100). (Searches include searches of drivers or property in the vehicle.) The search rate for all motorists who were stopped is 6.6%. Asians were searched at a rate well below the statewide average, and Blacks, Hispanics, and American Indians were searched at rates above the average for all motorists who were stopped. The search rate for the different groups also can be compared directly with one another. Blacks were 1.86 times more likely to be searched than whites (10.55/5.67). Hispanics were 2.13 times more likely than whites to be searched (12.07/5.67).

The reasons for conducting a search and the outcome of the search (i.e., discovery of contraband) should be considered when making comparisons across groups. Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. These searches may or may not result in an arrest. Other searches are conducted incident to arrest --

this means that there is no other reason given for the search other than arrest. Searches are almost always performed when there is an outstanding arrest warrant, whether or not contraband may be present.

The third summary indicator, the “contraband hit rate,” reflects the percentage of searches in which contraband is found. Contraband was found in 22.1 percent of all searches conducted in 2010. However, there is considerable variation in the contraband hit rate across race and ethnic groups. The contraband hit rate for whites was 24.5 percent, compared with 17.5 percent for African-Americans and 14.4 percent for Hispanics. This means that on average searches of African-Americans and Hispanics are less likely than searches of whites to result in the discovery of contraband. This difference may result in part from the higher arrest rates for African-Americans and Hispanics, circumstances that compel a search.

The “arrest rate” is the fourth summary indicator included in Table 1 that may be useful for assessing racial profiling. Just under 5 percent of all vehicle stops resulted in an arrest (83,919/1,688,720). The probability of arrest varies across the race and ethnic groups. Just over 8.2 percent of the stops of African-Americans and 8.9 percent of the stops of Hispanics resulted in arrest, compared with about 4.2 percent of the stops of whites. African-Americans and Hispanics are searched more often than whites, but they are arrested more often as well.

There are three appendixes to this year's full report. Appendix A presents the vehicle stop analysis using the statewide proportions of race and ethnicity, rather than those for each jurisdiction. This year's report compares the 2010 disparity index to the disparity indexes for 2000 through 2009.³ These comparisons are presented in Appendix B. For each agency, the disparity index for each race-ethnic group is presented for 2000-2010. For the state as a whole, the key indicators generally show small changes between 2009 and 2010. The third appendix included with this year's report, Appendix C, presents the key indicators using the 2000 Census figures for each jurisdiction's race and ethnic populations.

A reasoned determination of the existence of racial profiling in a community requires a comprehensive evaluation of the full range of information compiled in the agency reports. This brief summary of selected indicators for the state as a whole is intended to stimulate those local evaluations and dialogue.

ANALYSIS BY ATTORNEY GENERAL CHRIS KOSTER

Footnote 4

11 years ago Missouri released its first report on vehicle stop data. This report represents the tenth annual analysis of vehicle stop data in Missouri, a review that includes information about more than 1.7 million stops by law enforcement in the state during 2009. This report can be compared to data going back to 2000 on the Attorney General's Web site at ago.mo.gov.

The analysis in 2005, 2006, 2007, 2008 and 2009 used census estimates to reflect the changes in Missouri's population since the 2000 census. That census was the benchmark for the previous five reports. The 2010 statewide analysis used census estimates from the 2010 census.

As our state's population changes in number and demographics, these census estimates can help provide a more accurate benchmark to analyze the data. (Appendix C of this report provides key indicators by each agency using the 2010 census information.)

The overall number of stops reported decreased in 2010. As it has in the past, the disparity index for African-American drivers continues to be of significant concern. The disparity index for African-American drivers decreased slightly from 1.62 in 2009 to 1.61 in 2010. At the same time, the disparity index for Hispanic drivers decreased from .81 in 2009 to .78 in 2010, however, both groups continue to have search rates significantly higher than that of white drivers.

These findings continue a disturbing trend for African-American drivers in Missouri. Specifically, the disparity indexes for African-American drivers increased from 2005 – 2009 exhibiting disparity indexes of 1.42 in 2005, 1.49 in 2006, 1.58 in 2007 and 1.59 in 2008 and 1.62 in 2009, then a slight decrease in 2010 to 1.61. In fact, the disparity rate for African-American drivers has gone down only one other time in the history of the report again only slightly, to 1.34 in 2004 from 1.36 in 2003. Stated another way, the disparity index for African-American drivers increased in nine out of the last eleven years. The 2010 disparity rate of 1.61 compares to a rate of 1.27 eleven years ago. African-American drivers were 69% more likely than white drivers to be stopped based on their proportion of driving-age population in 2010, compared to 30 percent more likely than white drivers in 2000.

With 630 law enforcement agencies conducting vehicle stops in Missouri, there is no single explanation why these disparities exist. This report provides statistical information so the data from each agency can be examined, and appropriate questions asked of those agencies.

In 2004, state law was changed to require law enforcement to include investigative vehicle stops in their reports, in addition to the stops for traffic violations.

One of the best uses of these reports is as a springboard for dialogue and communication between law enforcement agencies and the communities they serve. It is vital that Missouri law enforcement agencies continue to review the rates of stops and searches and to continue their outreach efforts.

Statistical disproportion does not prove that law enforcement officers are making vehicle stops based on the perceived race or ethnicity of the driver. The compilation and analysis of data, however, does provide both law enforcement and the community with a starting point for dialogue to appreciate each other's perspective and arrive at common ground.

I am proud that Missouri took a leading role, under the stewardship of then-Attorney General Nixon, Governor Carnahan and many in the legislature, in passing legislation requiring the collection and examination of vehicle stop data on this scale. I pledge to continue that tradition in carrying on the detailed and critical examination necessary to ensure fairness to Missouri's law enforcement application. It is my hope that this report may serve as a springboard to open dialogue and legislative review.

We continue to show that commitment through laws that require each law enforcement agency to not only have a written policy regarding racial profiling, but also to provide additional training to officers and to promote the use of effective, non-combative methods for carrying out their duties in a racially and culturally diverse environment.

Missouri's law enforcement members continue to do commendable work in the face of many challenges. I appreciate their efforts and willingness to compile the information for these annual reports.

The number of agencies that did not comply with the vehicle stops reporting law in 2010 increased to 24. This represents an increase from 2009 when 13 departments failed to report. Failure to report is unacceptable and should be considered so by the General Assembly. A list of these agencies has been turned over to the Governor for imposition of the statutory sanctions.

Along with the data, several individual law enforcement agencies provided other information about factors that may impact their numbers. The reader should consider these factors when examining the data. Law-abiding drivers have the right to travel throughout Missouri without the fear that they will be stopped based solely on their race or ethnicity. I am confident that Missourians of all races and ethnic groups and law enforcement officers from throughout the state agree with me.

[[back to top](#)]

FOOTNOTES

Footnote 1: Hispanics may be of any race. About 1 percent of the population designated two or more races. These persons are included in the "other" category along with persons of unknown race.

Footnote 2: For detailed descriptions of the methodology used in forming the population estimates, see www.census.gov/popest/estimates.php and www.geolytics.com/USCensus.Estimates-Projections.Data.Methodology.Products.asp.

Footnote 3: Caution should be used when comparing 2000 to subsequent years, especially for smaller agencies, because the 2000 figures are based on only four months of traffic data, while those for subsequent years are based on the full calendar year.

Footnote 4: The executive summary relies upon and updates materials prepared for the 2007 Annual Report published under the administration of Attorney General Jay Nixon.

Agency response

The Bel-Nor Police Department provides contract police services for the City of Greendale, MO which has an estimated 2010 population of 651 residents. The City of Greendale contains a state highway which is heavily traveled. The Bel-Nor Police Department also patrols a state highway that contains the main entrance to the University of Missouri St. Louis which significantly impacts the number of vehicles on the roadway.

Agency response

We have 4 major shopping centers, and 6 strip malls with a total of 175 retail stores and 10 banks. We have 2 major interstate highways that access our city bringing approximately 170,000 vehicles thru our city per day. Our daytime population inflates to approximately 50,000 people. Brentwood is located centrally in the St. Louis Metropolitan area and in close proximity to St. Louis County Government Center, Jail and Courts. The Metro light rail system has a substation in our city with an attached 10 story parking garage that accommodates 1200 parking spaces. Our police department's racial profiling data for 2010 is consistent with data compiled for the past ten years for our police department.

Agency response

The City of Bridgeton is bordered on three sides by major interstate highways; namely, 70, 270 and 370. Also, US Highway 67, St. Charles Rock Road and Natural Bridge Road are major thoroughfares which run through the City. Bridgeton has a large transient population. It is also a heavy industrial area.

Agency response

Hwy 65 runs directly through town. Therefore we get quite a few travelers/tourists that pass through town.

Agency response

The City of Clayton is the county seat for St. Louis County. It contains the courts, government offices, juvenile detention center and the S. Louis County Justice Center, which houses over 900 inmates. In addition, Clayton is the home of several major corporations and contains over 6.5 million square feet of office space and one million square feet of retail. It is estimated that over 50,000 people visit Clayton on a daily basis to work, shop or do business. Most of those visiting Clayton reside in the St. Louis Metropolitan Area. Additionally, a number of major thoroughfares run through Clayton carrying commuters from various parts of St. Louis County requiring a significant amount of traffic enforcement: I-170, Forest Park Parkway, Hanley Rd., Clayton Rd., Brentwood Blvd and Forsyth. Therefore, it is felt that for purposes of this study, the racial makeup of the population should be in direct proportion to that of the St. Louis Metropolitan Area. At the very least, the racial breakdown should be in line with that of St. Louis County as a whole, rather than the resident population of Clayton. If the racial makeup of St. Louis County was used, the disparity index for blacks stopped in the City of Clayton would be 1.39.

Agency response

The City of Clinton is located on the main route between the Kansas City metropolitan area and the City of Springfield. As a consequence, a large number of non-Clinton residents pass through the City of Clinton.

Approximately 42% of all traffic stops made by the Clinton Police Department in 2010 took place on state highways.

Given the number of non-resident drivers stopped on state highways for traffic violations, any comparisons utilizing the population of the City of Clinton are inherently flawed.

RACIAL PROFILING DATA/2010

Agency response

The information submitted in our report is accurate. However, I would like to add additional information to the annual report. The Creve Coeur Police Department follows our reporting and ensures our awareness of our disparity index. Currently our disparity index for African-Americans is 3.54 for 2010. This is a decrease from 2006 (3.67), 2007 (3.66), 2008 (3.77); but a slight increase from 2009 (3.31). Additionally, we know that Creve Coeur residents are only 10% of all stops. 90% of those stopped are not residents of the city. Also, at least 70% of the time, we cannot determine the race of the driver prior to the stop. That relates to 7 out of 10 stops. The police department also knows that the more emphasis we place on traffic enforcement on residential streets, the more the percentage of residents stopped increases. The latest data we have from the US Census Bureau lists white population in St. Louis County as 73.5%; the black population as 21.8%. The rest of the drivers were classified as Asian, Hispanic, and American Indian or other. Our Police Department has also increased our racial profiling and interpersonal skills training to include training at the St. Louis Holocaust museum, which is POST certified training. We are seeking opportunities to enhance our awareness and ensure equal and fair treatment for all. We strive for courage, commitment, professionalism, and development where as our actions and relationships with the community are guided by an internal sense of honesty, integrity and morality.

Agency response

The population that you show on the top of the form is incorrect, the correct data according to the state of Missouri's web site is 902

As well you must also consider that we have three state highways running through our jurisdiction. This is vitally important information when looking and compiling our racial profiling information. We have State Highway 59 which runs North and South. We also have Highway "V" westbound to State Highway 71 and Highway "J" Eastbound which runs into State Highway 37.

Agency response

The Frontenac Police Department serves in St. Louis County, which has a population of 19% Black, 77% White, and 4% other. Our Department's 2010 total of 3,473 stops consisted of 15% Black motorists, 81% White motorists, and 4% Other. We have a two (2) mile section of U.S. Interstate 64, and the large Plaza Frontenac shopping mall in our jurisdiction. The total resident population is 3,482 in Frontenac, and another 1,057 residents in our three (3) contract cities of Crystal Lake Park, Huntleigh, and Westwood. Daytime population is much higher, due to the many businesses and major roadways in our jurisdiction.

Agency response

I have studied the summary of racial profiling data sent to me by your office for our police department. I believe there are a number of factors to be considered when analyzing this data and that it must be placed in the proper context before drawing any assumptions or conclusions. The City of Gladstone contains three sizable apartment complexes along a major thoroughfare through the City that serves as the principal connection to U.S. Highway 169, a well-traveled freeway that connects Gladstone to the City of Kansas City, and links our City to the Kansas City International Airport. These three apartment complexes offer government-subsidized housing that contain a disproportionate percentage of minority tenants. The City of Gladstone is completely surrounded by urban Kansas City, Missouri. There are several apartment complexes located within Kansas City that are immediately adjacent to the City of Gladstone and appear to house significant percentages of minority tenants. Several of these apartment complexes are accessible only via Gladstone city streets, generating significant motor vehicle traffic by motorists - including minorities - through Gladstone. In addition, Gladstone experiences considerable vehicular traffic that originates or terminates within Kansas City and does not involve Gladstone residents or their visitors. The combination of freeway access, being surrounded by metropolitan Kansas City, the concentrations of lower-income minority tenants in three apartment complexes, the visitor traffic generated by these apartments, and traffic generated from outside our City, attracts a higher percentage of motorists - including minorities - than the proportion of minority residents of the City would suggest. The Gladstone Public Safety Department has established policies to ensure minorities are not disproportionately subject to stops or arrests by our police officers. These policies are reinforced by active supervision of our law enforcement officers to assure that racial profiling or other discriminatory behavior does not exist.

Agency response

Although the City of Glendale is a small bedroom community within the I-270 corridor of St. Louis County, thousands of motorists travel through each and every day. Three major shopping centers, which are located nearby, increase the daily traffic flow, adding to the normal commuters travelling to and from work, school and play. Our northern border is Missouri State Highway 100, a major east – west thoroughfare, with an average of over 30,000 vehicles per day. We have two county arterial roads, both averaging over 10,000 vehicles per day. We are within a half-mile of Interstate 44, which allows for easy access to St. Louis and the Interstate system. We are a small city with metropolitan traffic.

Agency response

The first area that caught my attention was the demographic break-down for the local population. The State's report is indicating: 59.47% White, 30.72% Black and 5.28% Hispanic. A more accurate reflection based on the recent census has our numbers at: 45% White, 40.8% Black and 9.7% Hispanic. An additional look at our local high school shows a demographic break-down for the two upper grades (driving age) at: 20.4% White, 66.5% Black and 10.6% Hispanic

Additional information about our City is the fact that we are bisected by 71 Hwy, which funnels directly into the southern section of Kansas City, Missouri. This highway is a direct corridor to the inner city that maintains a high minority population. Much of our evening traffic is associated with motorists that are traveling back and forth to the inner city.

I hope you find this information useful and it provides a more accurate reflection of the demographics of our driving population. If you need additional information or clarification, feel free to contact me.

Agency response

The City of Hannibal has both the US 61 and US 36 Highways intersecting within its boundaries. In addition, Hannibal is known as "America's Hometown" and for "Mark Twain" which draws a sizable number of tourists annually. Considering all these factors demonstrates Hannibal's local population as related to race is an inaccurate representation of what local law enforcement officers encounter in the performance of their duties. The statewide population % concerning race is a more accurate representation of the populace officers interact with during the completion of their duties.

Agency response

The City of Hazelwood is a destination city for shoppers and employment. Hazelwood is home to approximately 1000 businesses employing over 25,000 employees. We have a 1.3 million square foot under roof shopping mall which attracts over 2 million customers annually. We have Interstate 270 which traverses the city with I-170 intersecting I-270. Each of these interstates carries over 130,000 vehicles per day. We have 3 major north south arterial roadways through the city carrying over 100,000 vehicles per day. We have numerous minority visitors and motorists who visit and travel to and through the city.

Agency response

In 2010 our African American minority driving population was estimated to be reflective of the 2000 census population of approximately 2.6% (2010 Census numbers for population demographics of individual cities are unavailable and have not been released at this writing) and car stops on African Americans was approximately 14.2% of all traffic stops. This higher percentage disparity is accounted for by the higher percentage of population from Kansas City, which borders our west city limit, that travel to Independence on a daily basis for jobs, destination shopping, and entertainment. Independence has a new Event Arena, presidential library, waterpark, new Sports Center, Independence Center Mall, the very popular Independence Commons Theatres with stadium seating, Bass Pro Complex, Sam's Warehouse, Lowes, Walmart, Home Depot, Target, J.C. Penny and numerous other new retail stores, restaurants, and hotels to name just a few of the draws to this area.

The City of Independence has numerous State and Federal Highways that run through it from outlying Kansas City Metro areas. Also as stated Independence has numerous new shopping centers, entertainment centers and a large Shopping Mall and complex that provide entertainment and jobs for the Metro Area that increase and distort our daytime population. The most recent posted 2009 MODOT traffic volume and commercial vehicle counts of I-70 Hwy alone from our western border with Kansas City eastbound to our eastern border with Blue Springs indicate an average daily vehicle count of 115,802 that enter Independence and only 70,091 that proceed eastward meaning that we have an influx of 45,000 vehicles entering Independence as their destination. Assuming these visitors with business in Independence reflect the demographics of neighboring Kansas City it would be logical to assume our daily minority population is much larger and not representative of the census numbers referring only to those who live here.

One other point to consider is that the African American population of Independence is growing. A recent Demographic and Housing Estimate updating the 2000 Census shows a population of 5.2% more than double that of 2000.

The Independence Police Department is an internationally accredited Police Department that does not tolerate racial profiling. Officers receive annual training on cultural challenges and issues. We are committed to ensuring we maintain accountability and integrity of the racial profiling documentary process which indicates the level of professionalism within the Independence Police Department.

RACIAL PROFILING DATA/2010

Agency: Ironton Police Dept.

Population: 1,064

age 16 and over

KEY INDICATORS	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Stops	588	571	15	0	0	1	1
Searches	25	25	0	0	0	0	0
Arrests	19	18	1	0	0	0	0
Statewide population %	N/A	83.36	10.73	2.58	1.54	0.51	1.27
Local population %	N/A	92.48	3.95	0.56	0.47	0.56	1.97
Disparity index	N/A	1.05	0.65	0.00	0.00	0.30	0.09
Search rate	4.25	4.38	0.00	#Error	#Error	0.00	0.00
Contraband hit rate	20.00	20.00	#Error	#Error	#Error	#Error	#Error
Arrest rate	3.23	3.15	6.67	#Error	#Error	0.00	0.00

Notes: Population figures are 2010 Census estimates for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Agency response

Disparity indexes have not fluctuated significantly since the data collection began in 2000. However, these numbers should be interpreted cautiously. Specifically, relying on the census population for ages 16 and over as a benchmark does not provide a realistic picture of the driving population in Kansas City, Missouri at any given time. There are several major thoroughfares that run through the city, including I-29, I-35, and I-70 that contain a large percentage of drivers not reflected in the static census population used for comparison purposes. Additionally, Kansas City is contained within a metropolitan population of approximately 2.0 million, which adds to the commuter population on the major thoroughfares. Also, when examining search rates, the probable cause/authority to search reasons should be considered. By design, the form on which the AG office submitted the summary report did not include the new category Stop Outcome "Other", which accounted for 5,475 stops. The Total Stops figure, however, includes stops associated with this new category. Lastly, KCPD views vehicle stop data collection as one of many tools to address the issue of racial profiling. Other tools in use by the department include training, community programs, and policies.

RACIAL PROFILING DATA/2010

Agency: **Kearney Police Dept.**

Agency response

Kirksville is home to two major universities whose enrollment data is not totally reflected in the census figure. Truman State University and Kirksville College of Osteopathic Medicine account for an additional 6,000 students/residents (2009 numbers indicate that 19.3 percent of the Truman students are identified as other than white, and 96 percent come from outside Kirksville, including at least 309 international students). Kirksville is located on one of the few major north-south state highways (Highway 63) that service northern Missouri and southern Iowa. 8,700 vehicles per day travel the highway into and out of town. Kirksville is the largest city for miles and is the cultural/economic hub for a very large area. This expands the pool of those not counted in the city's census information.

Agency response

The only concern which would arise from our Racial Profiling appears to be the Disparity Index of 3.53 for Blacks. My Chief Deputy found a report in our Records Management which lists all stops ect. by officers. The most stops of blacks by an officer was 7. That 7 was 4% of his traffic stops. Two were arrested for DWI. One stop was a report from Lebanon P D of two males in a vehicle selling marihuana. He located the vehicle and the passenger was black. In another stop where a black passenger was involved, the vehicle was stopped because it was being driven on the rim after the tire went flat. The report also shows that only 72% of persons stopped were residents of our jurisdiction. As you are probably aware Laclede County has 30 miles of Interstate 44 and 34 miles of Hwy 5, along with Mo Hwy 32 and 64. Ft Leonard Wood is in adjoining Pulaski Co. on I-44. Hwy 5 is the main access route from south and west of Lebanon towards The Lake of The Ozarks, Jefferson City and Columbia. I believe that the racial breakdown of those traveling within Laclede County is markedly different than those percentages used for the disparity index.

Agency response

The City of Ladue and similar communities throughout Missouri are particularly critical of the Attorney General's Vehicle Stops Report because it does not accurately measure the population of individuals (by race or ethnicity) at risk of being stopped by its police officers. This overly inflates the disparity index in Ladue and these communities making it appear as if their officers are racial profiling. Last year, the City of Ladue was unfairly identified as one of the "10 worst places to drive black [sic] in Missouri" (St. Louis American, 2009, p. 2). Additionally, The Missouri Attorney General said "it was more than 1,700 percent more likely a black [sic] driver will be stopped in Ladue based upon the African-American population of Ladue" (pp.2-3). Given the poor quality of the Report's data and methodology such statements are misleading, at best. In fact, these statements cannot be supported by the available data.

Within the past year the City of Ladue has;

- Developed an interactive system that relies on an internal benchmark for monitoring vehicle stops at the individual officer level,
- Identified additional methods for evaluating vehicle stops and post stop events (i.e. arrests, searches, etc.) that are more precise than the methods used by the Attorney General,
- Subjected its 2008,2009 and 2010 vehicle stop data to a more rigorous analysis by a nationally recognized racial profiling expert,
- Met with representatives from the United States Department of Justice, and
- Established a productive dialogue with representatives from area advocacy groups, including the National Association for the Advancement of Colored People.

The City of Ladue learned that the method used by the Attorney General to calculate the disparity index has been summarily discredited by experts in racial profiling research. The Attorney General's method uses a community's residential population to estimate its driving population. This method does not account for transient traffic, like motorists who drive through a community but do not live there. The Attorney General's own experts have publically criticized the use of the residential population as an estimate of the driving population. Two Interstate highways and several other heavily travelled regional transportation systems either traverse or border the City of Ladue. The average daily traffic on these thoroughfares is *fifteen times larger* than Ladue's residential population and likely very different in terms of its racial and ethnic proportions.

To more precisely evaluate its vehicle stops the City of Ladue developed a system whereby each officer's performance is compared with that of other similarly situated officers. Among the various methods used to identify potential racial profiling behaviors this technique is the most promising. In fact the United States Department of Justice often uses this technique to monitor police departments accused of civil rights violations. Using this method the City can actually identify specific officers who are stopping substantially higher proportions of drivers from one racial or ethnic group.

Ladue provided its 2008 and 2009 vehicle stop data to an independent researcher for analysis. This researcher, Dr. Brian L. Withrow an Associate Professor from Texas State University, subjected these data to various analyses. Professor Withrow has authored numerous articles, conducted studies throughout the nation, testified as an expert witness in more than a dozen court cases, and published two books on racial profiling. After evaluating Ladue's 2008 and 2009 vehicle stops data he concluded;

- ***There is no single officer or small group of officers in the City of Ladue who appear to be consistently stopping inordinately high proportions of African-American drivers.***
- ***These results of the internal benchmark analysis do not provide support for an accusation of racial profiling.***
- ***Consistently, African-American individuals appear to be arrested in higher proportions for non-discretionary rather than discretionary reasons. This finding suggests that police officers in the Ladue Police Department do not appear to be using their discretionary arrest authority to the disadvantage of African-American drivers or individuals.***
- ***Although the police officers in Ladue are searching a higher proportion of African-American drivers and individuals, they appear to be more likely to find contraband during these searches. More importantly, it would appear that factors, other than the race of the individual searched, are more important indicators of search productivity.***

Dr. Withrow's subsequent analysis of Ladue's 2010 vehicle stop data reached the same conclusions. There is simply no evidence of racial profiling within the Ladue Police Department.

Agency response

Interstate Highway I-70 and U.S. Highway 24 both transect our county, each approximately 30 miles in length. The motoring public demographics are disparate from Lafayette County demographics.

Agency response

The City of Lake Saint Louis is bordered by Interstate 70 to the north and Interstate 64 (U.S. Highway 40/61) bisects the south end of the municipality, resulting in a fair amount of non-local traffic. Consequently, many drivers stopped for traffic violations in this venue are non-residents. Because of this, calculating a disparity index based on a comparison of ethnicity of drivers stopped with the ethnicity of the local population may be misleading.

RACIAL PROFILING DATA/2010

Agency: Lake Tapawingo Police Dept.

Population: 683

age 16 and over

Agency response

Our city is located at the intersection of U.S. Hwy 50 and State Hwy 127, with Casey's General Store at that intersection. Given the overall population of the state, and the travelling public, I am surprised the number of Blacks and Hispanics weren't higher. Our new census population is 1,604 with over 35% Hispanic. And that is within the city limits, not counting the surrounding area.

Agency response

In response to your letter dated April 19, referencing the opportunity to present additional information or clarification with regard to the racial profiling data submitted by our agency, please find further explanation below:

North Kansas City has a list of demographics that make it a challenge to discern meaningful data regarding racial profiling analysis. The city is only 4.5 square miles, with approximately 4,200 residents, however, 6 highways travel through the city limits carrying an estimated 200,000 vehicles a day. Furthermore, the City's daily workforce/daytime population is estimated at 35,000 people at over 1,100 businesses. There is no information regarding the race/sex make up of the daily motorists or the work force.

Due to the small size of the department, and the unique "Urban Village" description, we are not able to compare individual officer's statistics with other officers working in a similar environment. We do constantly compare our stop data among our officers, and we also consider the Kansas City, Missouri census data (which surrounds our city limits on all sides) when we are determining the reasonableness of our statistics.

Recently, the department conducted research that included demographics from five miles in all directions (simulated city of 100 sq. miles), which resulted in Disparity Indexes close to 1 in all categories.

Agency response

The City of O'Fallon is located in the center of St. Charles County. We have 2 major Interstates – I-70/64 and State Highway 79. O'Fallon also has a major arterial roadway -- MO K -- that connects the 3 highways from north to south and is a major retail corridor. Because of these heavily traveled roadways, our driver population is more diverse than the census population would indicate, making our disparity index artificially high.

Agency response

Olivette is a major corridor for the St. Louis Metropolitan area with major interstates and roadways that pass through or are immediately adjacent to the city. These interstates and roadways are the pipeline connecting thousands of people traveling into and through Olivette for business and pleasure purposes. These roadways also serve thousands of motorists throughout the region traveling to and from various destinations. Thus, the motorists stopped for traffic violations are more reflective of the population of the entire metropolitan area rather than the resident population of Olivette.

Agency response

The City of Osage Beach is unique in that it lies along the shores of the Lake of the Ozarks, one of the largest man-made lakes in the nation. The City is a major destination resort area and has wide fluctuations in population during the year. The City is also home to Osage Beach Premium Outlets, a shopping mall featuring over 110 stores, which draws tens of thousands of visitors to our city.

Agency response

Our alleged higher than proportional incidence of stops of black citizens centers around the fact that there are 6 food processing plants within a 45 minute drive of Sedalia. The workers live in and around Pettis, Johnson and Saline counties and drive to the plants daily. Tyson Foods of Dresden, Missouri is the largest food processing plant in Pettis County. These plants employ a large number of Hispanic and black workers. Along with this is the fact that the University of Central Missouri is located in Warrensburg, Missouri, Johnson County. A large number of day and evening students from surrounding counties commute to UCM daily. While our Disparity Index for black traffic stops is 1.83, this is based on a total of 25 stops of black citizens. That is 2 stops of black citizens per month. Vehicle stops by the Sheriff's Office are based on traffic violations observed, not the possible race of the drivers. The vast majority of the time the race of the people stopped is unknown until the vehicle is actually stopped. Searches are conducted based on the actions of the individuals stopped or incident to lawful arrest. Race is not a factor in deciding who will or will not be asked for consent to search or who will be searched incident to arrest.

Agency response

While the population of the City of Platte Woods is only 411, the traffic count by the last MODOT survey in 2009 is a minimum of 86,000 vehicles per day. Per MODOT estimate, that number has increased by 15 – 20 % since the last survey. This directly affects the number of traffic stops made by our department.

Agency response

The City of Raymore, Missouri, maintains the only 24-hour Walmart Supercenter in the entire south Kansas City metropolitan area. The Supercenter services a number of communities, such as Grandview, Raytown, and south Kansas City, all of which have a more racially diverse population than Raymore. It is the position of the Raymore Police Department that any disparities in the proportion of stops/proportion of population can be attributed to the fact that a large portion of the motoring public do not reside within the city limits of Raymore.

Agency response

Your form shows our population-age 16 and over at 7,427. According to the census from 2010, our total city population is 14,751. Our school district, which includes a large geographic area outside the city limits, is approximately 4,000. Your figure would indicate our city population under 16 y.o.a., is equal to our adult population and that is not accurate.

Your letter asks about other clarifications such as highways, major employers and shopping:

- 1 We are a connected suburb of the City of Springfield, with U.S. Highway 60 passing through us as a major route to Oklahoma and all of the cities along it that travel to and from Springfield. The traffic count on this highway is approximately 26,000 vehicles per day.
- 2 We are also connected via State Highway 174 to Interstate 44 and to Mount Vernon.
- 3 We have several state roads that connect us to other jurisdictions, to Interstate 44, to Hwy-60, and James River Freeway.

We have several major employers and shopping destinations within the city that draw private and commercial vehicles from the surrounding areas such as our school district, Wal-Mart, Lowes, Hermann's Lumber, McLane distribution warehouse, Magellan Pipeline, numerous car dealerships, and abundant other food and supply stores. Our City Hall has approximately 530 businesses listed for Republic

Our Parks and Recreation is one of the largest in the region and hosts a large number of sports tournaments, athletic events, car shows, festivals, etc... We are also contiguous with Wilson's Creek National Battlefield, which draws approximately 186,000 visits per year that pass through Republic to enter.

Agency response

The City of Richmond Heights is a 2.8 sq. mile city incorporated in 1913 located on the western boundaries of the City of St. Louis. Richmond Heights has three miles of US 64 (Highway 40) running directly thru it. Highway I-70 runs north and south from US 64 to the city limits of Clayton. Located in Richmond Heights is the Galleria Shopping Mall and the new Boulevard Shopping District. The Galleria Mall and the Boulevard generate approximately 11 million shoppers or visitors each year. Richmond Heights also borders the City of Clayton, which is the county seat for St. Louis County. Thousands of vehicles travel thru Richmond Heights on a daily basis due to its geographic location. Estimated daytime population of Richmond Heights is 26,000.

Agency response

The data for the St. Charles County Sheriff's Department lacks creditability for several reasons. St. Charles County is home to several major employers including but not limited to General Motors, Mastercard International and Citicorp. One should also consider the County is also traversed by two Interstate Highways, I-70 from East to West and 40-64 generally from South to North. Also there are two major shopping malls along the I-70 corridor. These criteria should have a place in the flawed computation or formula.

Agency response

The City of St. Louis is approximately 62 square miles in size and lies at the core of the largest metropolitan area in the state. The City is comprised of 79 diverse neighborhoods and 105 city parks, and is home to a world-class zoo and other major museums and visitor attractions. The City hosts every home game for our three major sports franchises, a multitude of concerts and theatrical performances at various venues, and a set of large regional cultural events which includes the second-largest Mardi Gras celebration in the country. While the data compiled in this report are informative, it is important to note that the disparity indices represent proportions of vehicle stops divided by the proportions of racial categories within the resident population only. As a result, a high disparity rate does not serve as proof of racial profiling. Department policy prohibits racial profiling and officers must adhere to the policy. Every commissioned member of the Department receives yearly training against the practice of racial profiling, as required both by state law and by Department policy. This training is further supplemented and reinforced by periodic courses in related topics such as cultural diversity, ethics and tactical communication. The Department continues to work with its officers, local leaders and community partners to identify best practices as they relate to vehicle stops.

RACIAL PROFILING DATA/2010

Agency: St. Louis County Police Dept.

Population: 790,612

age 16 and over

Agency response

While the data compiled in this report is informative, any conclusions drawn from the data must be tempered with common sense. For example, population data used to calculate the disparity index does not include members of the minority community that reside in the City of St. Louis and, therefore, increases the diversity of drivers on the roads within St. Louis County. Nor does the data reflect that in a majority of traffic stops, police officers do not know the race of the driver prior to initiating the traffic stop. Our Department policy specifies that race-based detentions, traffic stops, arrests, searches and seizures of property are forbidden. In 2010, our Department received 341,098 calls for service; officers made 17,644 full-custody arrests and 91,091 traffic stops with four unfounded complaints of racial profiling. All commissioned officers participate in annual cultural diversity, sensitivity training, and specialized training that prohibits the illegal practice of racial profiling. Supervisors review traffic stop data on a quarterly basis to ensure that officers do not engage in biased based policing.

Agency response

The following conditions may influence minority contacts in St. Peters. Interstate Highway 70 and Missouri Highways 94, 370 and 364 pass through or terminate within the City. Mid Rivers Mall, a major retail development, is located along Interstate 70 and Highway 370. The community is home to several regionally significant office and professional campuses; and employees of local businesses, commuter traffic and retail customers significantly increase the non-resident driving population.

RACIAL PROFILING DATA/2010

Agency: **St. Peters Ranger Enforcement Div.**

Population:

age 16 and over

Agency response

Thank you for the opportunity to provide an explanation regarding the 2010 summary of racial profiling data for the City of Town and Country. It is unfortunate that our disparity index is based upon the population demographics of the City of Town and Country, which has a population of approximately 11,000 people with an African American population of 2.25 percent. Nearly 400,000 motorists travel through our city limits each weekday with the second most voluminous interchange in the state (Interstates 64 and I-270). Our motoring public is reflective of the demographics of the state and St. Louis County, which are comprised of African American populations of 10.73 and approximately 19 percent respectively. The traffic stop data for Town and Country Police Officers indicates that only 3.6 percent of the motorists stopped are residents of Town and Country. The natural implication of this statistic is that the ratio of the race of motorists stopped for violations would reflect state and county demographics, not the City of Town and Country. The Town and Country Police Department is committed to the fair and impartial application of the law while attempting to maintain a safe environment for all people who travel in and through our City limits. A careful examination of the data indicates that our practice matches this policy.

RACIAL PROFILING DATA/2010

Agency: Univ. of Missouri-Columbia PD

Population:

age 16 and over

KEY INDICATORS	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Stops	6005	4724	688	12	191	0	390
Searches	470	366	76	3	3	0	22
Arrests	416	319	68	3	3	0	23
Statewide population %	N/A	83.36	10.73	2.58	1.54	0.51	1.27
Local population %	N/A						
Disparity index	N/A						
Search rate	7.83	7.75	11.05	25.00	1.57	#Error	5.64
Contraband hit rate	26.17	27.32	22.37	0.00	0.00	#Error	27.27
Arrest rate	6.93	6.75	9.88	25.00	1.57	#Error	5.90

Notes: Population figures are 2010 Census estimates for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: Proportion of stops by racial category/proportion of statewide population of that racial category. A value of 1 indicates local stops within a racial category equivalent to that racial groups proportion in the state population. A value less than 1.0 indicates a lower proportion of stops of that racial group lower than its proportion in the state population. A value greater than 1.0 indicates a higher proportion of that racial group than its proportion of the statewide population.
